DETACHED GARAGE COMMENTS

- (1) The detached garage has a crushed rock floor on dirt. There is no concrete slab.
- (2) The "top of bottom floor" elevation listed on page 1 of this certificate is at the highest measured point on the garage floor, which is the northwest corner. The floor is not level and follows the existing ground elevation, which appears to be natural grade. Therefore the highest adjacent grade and the "top of bottom floor" elevation are the same at the northwest corner of the structure.
- (3) The bottom of all 19 flood vents are within one foot of existing grade. Each vent measures about 9 inches by 6 inches. Total square inches are 1,026. The vents all have a wire mesh covering.
- (4) There was no equipment or machinery servicing the structure at the time of the survey (Feb. 09, 2011)
