## **ELEVATION CERTIFICATE**

## FEDERAL EMERGENCY MANAGEMENT AGENCY NATIONAL FLOOD INSURANCE PROGRAM

ATTENTION: Use of this certificate does not provide a waiver of the flood insurance purchase requirement. This form is used only to provide elevation information necessary to ensure compliance with applicable community floodplain management ordinances, to determine the proper insurance premium rate, and/or to support a request for a Letter of Map Amendment or Revision (LOMA or LOMR). Instructions for completing this form can be found on the following pages.

## SECTION E CERTIFICATION

This certification is to be signed by <u>a land surveyor</u>, <u>engineer</u>, or architect who is authorized by state or local law to certify elevation information when the elevation information for Zones A1–A30, AE, AH, <u>A (with BFE)</u>, V1–V30, VE, and V (with BFE) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a property owner, or an owner's representative may also sign the certification.

Reference level diagrams 6, 7 and 8 - Distinguishing Features—If the certifier is unable to certify to breakaway/acri-seakaway wall enclosure size, location of servicing equipment, area use, wall openings, or unfinished area Feature(s), the diagram number, Section C, Item 1, must still be a section of the certification under Comments below.

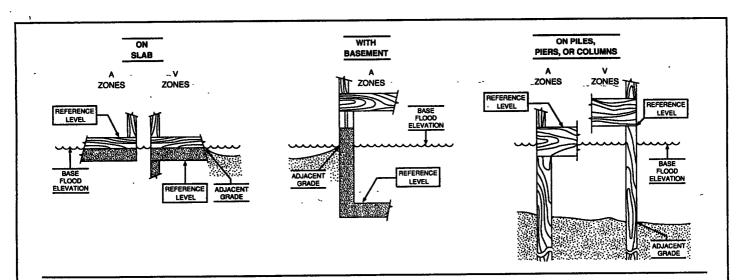

I certify that the information in Sections B and C on this certificate represents my best efforts to interpret I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code

Copies should be made of this Certificate for: 1) community official, 2) insurance agent/company, and 3) building owner.

COMMENTS: Per photogrammetric Topographic Morphy McLain Harbons
Lo DATED Sept. 1992 BASIS OF Elevation @ 2685,00

@ E 1/4 cor of Section 30 T-135 R.16E 685 RB4M

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.
