## SECTION E CERTIFICATION

This certification is to be signed by a land surveyor, engineer, or architect who is authorized by state or local law to certify of exation information when the elevation information for Zones A1 A30, AE, AH, A (with BFE), V1 V30, VE, and V (with BFE) is required. Community officials who are authorized by local law or ordinance to provide floodplain management information, may also sign the certification. In the case of Zones AO and A (without a FEMA or community issued BFE), a building official, a properly owner, or an owner's representative may also sign the certification.

Reference level diagrams 6,7 and 8 - Distinguishing Features—If the certifier is unable to certify to breakaway/non-breakaway wall, enclosure size, location of servicing equipment, area use, wall openings, or unfinished area Feature(s), then list the Feature(s) not included in the certification under Comments below. The diagram number, Section C, Item 1, must still be entered.

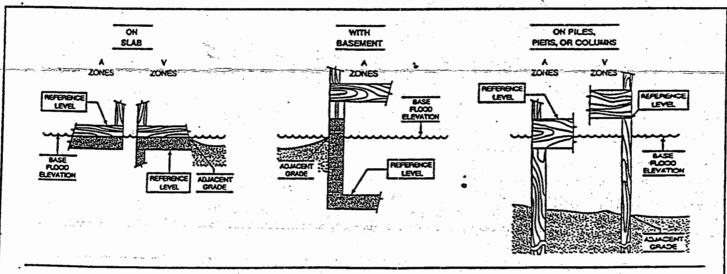

I certify that the Information in Sections B and C on this certificate represents my best efforts to interpret the data available. I understand that any false statement may be punishable by fine or imprisonment under 18 U.S. Code, Section 1001.

Copies should be made of this Certificate for: 1) community official, 2) insurance agent/company, and 3) building owner.

COMMENTS: Pima County Floodplain and Erosion Hazard Management Ordinance 1994-FC2 in Article XI requires the bottom of the structural frame of a manufactured home to be a minimum of one foot above the base flood elevation. For "A" or "AO" Zones Pima County requires the manufactured home floor reference level to be a minimum of one and one half feet above the bottom of the structural frame elevation which equals two and one half feet above the base flood elevation as listed in Item 6 of Section B of this form. This elevation certificate is to be certified in Sections C and E. A copy is to be returned within seven days of placement of the manufactured home, to Pima County Floodplain Management Section, 201 N. Stone 4th floor, Tucson, AZ 85701.

——Phone 740-6350.

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones.

Elevations for all A Zones should be measured at the top of the reference level floor.

Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.
